

PUVIYARASI P

Full Stack Developer | Python & Django

+91 76039 09649 | ppuviyarasi.002@gmail.com | P.N. Palayam, Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Full Stack Developer with strong expertise in Python and Django, focused on building scalable, secure, and maintainable web applications. Proficient in front-end technologies including HTML, CSS, JavaScript, and Bootstrap, with hands-on experience in MySQL for efficient database design and data management. Skilled in developing RESTful applications, implementing authentication systems, and following the MVC architecture. Experienced in collaborative development with Git and GitHub, and committed to writing clean, efficient, and maintainable code.

WORK EXPERIENCE

Software Trainer

Oct 2023 – Present

Refinement Software Solutions Pvt. Ltd. — Coimbatore

- Delivered structured training programs in Full Stack Python Development and Software Testing.
- Conducted hands-on sessions covering Python, Django, HTML, CSS, JavaScript, MySQL, and Selenium.
- Mentored students through the development of real-time projects following industry coding standards.
- Designed assignments, coding exercises, and assessments to reinforce core concepts.
- Strengthened students' problem-solving and debugging skills through guided practice.
- Continuously upskilled in modern full stack development practices and tools.

PROJECTS

Weather Application — Django

- Developed a real-time weather application using Django integrated with third-party APIs.
- Built a dynamic, responsive user interface with template rendering.
- Implemented reliable API data handling and error management.

Billing System — Python (Tkinter)

- Designed a desktop billing application featuring product management and invoice generation.
- Implemented data storage and reporting functionality for daily transactions.

User Management System — Django

- Built a CRUD-based application with structured database integration.
- Implemented data validation and session handling for secure user operations.

Authentication System — Django

- Developed a secure login and registration system using Django's authentication framework.
- Implemented session management and role-based access control.
